# Copley Primary School

## Case Study

webanywhere

**Location:** Halifax

**WebAnywhere product used:** School Jotter

Copley Primary School is situated in Halifax, West Yorkshire. The school currently has over 220 pupils between 4 and 11 years old.

In December 2008, Copley decided to update their existing WebAnywhere website with a move to the School Jotter content management system. They were keen to retain the Flash welcome page which WebAnywhere had designed for the original site, but wanted the main site to be rebuilt in School Jotter.

The benefits to the school were clear. Using School Jotter, they were able to edit their website from anywhere with an Internet connection, where previously they had been restricted to using specific computers at the school which had web design software installed. This made it much easier to keep the site's content fresh and up-to-date, encouraging repeat visits.

At present, Copley have one of the largest sites hosted with School Jotter, in terms of the amount of content they have uploaded. Visitors to the website can find an archive of newsletters, policy documents and letters as well as the school and parent's association calendars, links to the pre-school and kids, club and details of staff, governors and the school council.

Photographs, podcasts and interactive spelling and maths tests add a multimedia aspect to the website, and visitors can also leave their comments, allowing the school to constantly improve the site in response.
