

## Case Study

# Copley Primary School, Halifax

### General

Copley Primary School is situated in Halifax, West Yorkshire. The school currently has over 220 pupils between 4 and 11 years old.

### Moving to School Jotter

In December 2008, Copley decided to update their existing Webanywhere website with a move to the School Jotter content management system. They were keen to retain the Flash welcome page which was designed by Webanywhere for their original site. Their main site was then rebuilt in School Jotter. The benefits to the school were clear. Using School Jotter, they were able to edit their website from anywhere with an Internet connection, where previously they had been restricted to using specific computers at the school which had web design software installed. This made it much easier to keep the site's content fresh and up-to-date, encouraging repeat visits. At present, Copley have one of the largest sites hosted with School Jotter, in terms of the amount of content they have uploaded. Visitors to the website can find an archive of newsletters, policy documents, calendars. Links to the pre-school and kid's club, staff, governors and school council can also be found.

### Multimedia

Photographs, podcasts and interactive spelling and maths tests add a multimedia aspect to the website, and visitors can also leave their comments, allowing the school to constantly improve the site in response.

Established in 2003, Webanywhere began as a school website design company. Since then we have expanded our product range to include VLEs, e-portfolios and other elearning tools, alongside curricular content. We're an official Moodle Partner and Capita Technical Partner, as well as a Mahara Partner and Google Apps Authorised Reseller.

Our product range supports schools in improving key metrics such as pupil achievement, quality of teaching, effective leadership and behavioural standards. School Jotter, the name for our school websites, is simple and easy to use and allows schools to add to, and update, their own website easily and quickly.
