

LEARNING PLANS

Help your employees prepare for new responsibilities.

As one of the most important investments within your organisation, it is critically important to align employee development with organisational strategies.

Learning plans within Totara Learn allow your employees to develop the specific competencies needed to improve performance in their present position, or to prepare for new responsibilities. With quick and targeted access to relevant learning, employees can see their progress at a glance.

SUPPORT DIFFERENT LEARNING WORKFLOWS FOR DIFFERENT LEARNER GROUPS

Depending on a learner's job assignment, position, department or where they sit within the management hierarchy, they can be assigned a different learning plan template.

Template-based learning plans allows you to set custom permissions around the creation and update of plans specific to the needs of different groups of learners.

Competencies and their associated courses can also be automatically pulled into plans based on a learner's job position and area of the organisation.

CREATE PERSONALISED LEARNING EXPERIENCES

Users or managers can create learning plans for different areas of development and personalise each plan by setting individual due dates, priorities and objectives.

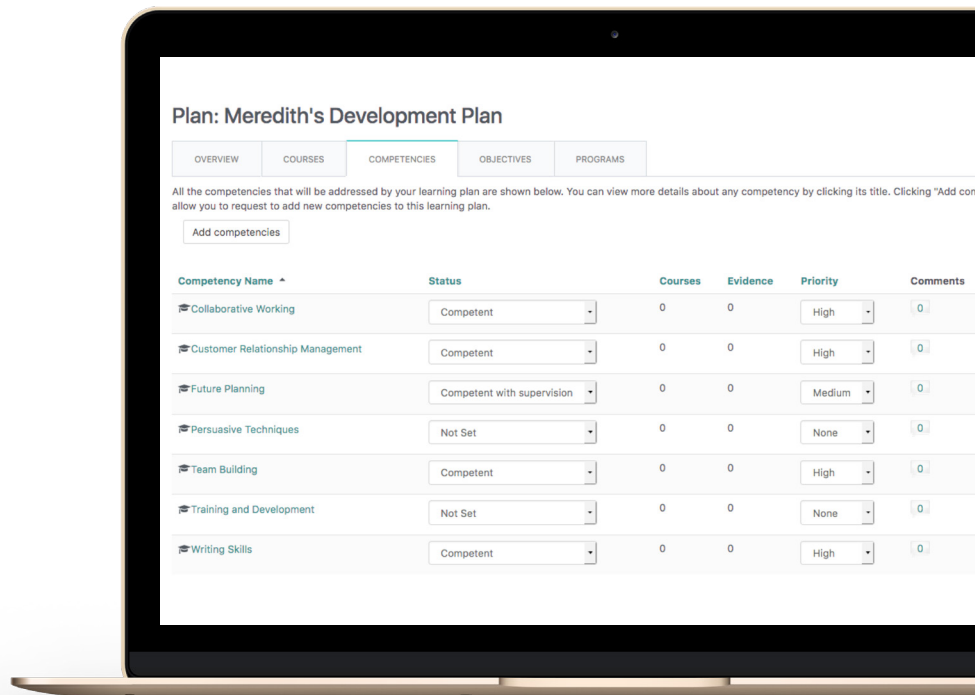

Plans can be continuously updated with new competencies, courses, programs and certifications as needed by the learner or their manager, depending on the plan template.

Learners can use their development plan to view due dates, quickly access learning activities and add learning objectives.

MONITOR PROGRESS WITH LEARNING RECORDS

All learners have a personalised learning record where they can view their active and completed learning and development, and managers can monitor the ongoing progress of their staff's professional and personal development.

A learning record also stores all submitted evidence of external or previous learning, and feeds into reporting against completion, compliance and training across the whole organisation.
